- i) Introduction to ratio. Simple practical problems on ratio.
- ii) Introduction to percentage. Simple practical problems on percentage.

2. Proportion and partnership :

- i) Concept of proportion, simple and compound proportion, direct and inverse proportion. Simple practical problems only.
- ii) Application to division into proportional parts and partnership.
- iii) Example

3. Profit and Loss

Cost price, selling price, profit on cost price, Loss on cost price, problems involving discounts and or commission are expected.

4) Sequences:

Arithmetic and geometric progression, n^{th} term of A. P. and G. P, simple problems on sequence.

5. Shares and Dividend

Concept of share, stock exchange, face value, market value, dividend, equity shares, preferential shares, house shares, examples.

BUSINESS STATISTICS

6. Scope of Statistics

- i) Definition of statistics.
- ij) Scope of statistics in industry, economics, management sciences and social science.

7. Classification and frequency distribution:

- i) Raw data, attributes, variables, classification, meaning of classification, functions of classification, bases of classification.
- ii) Meaning of frequency, Relative frequency, cumulative frequency, class limits, class boundaries, mid-point, class-interval. Inclusive, exclusive and open-end classes.
- iii) Formation of ungrouped and grouped frequency distributions

8. Graphs and Diagrams :

- i) Simple bar diagrams, Multiple bar diagrams, percentage bar diagram, pie diagram.
- ii) Histogram, Frequency polygon, frequency curve, ogive curve.

9. Measures of Location :

- i) Meaning of measures of location, Types of measures of location.
- ii) Arithmetic mean, calculation of Arithmetic mean for raw data, ungrouped data and grouped frequency distribution, combined mean for two groups.
- iii) Median - Meaning, calculation of median for raw data, ungrouped and grouped frequency distributions.
- iv) Mode - Meaning, calculation of mode for raw data, ungrouped and grouped frequency distribution.
- v) Quartiles - calculation of quartiles for raw data, ungrouped and grouped frequency distribution.
- vi) Examples

**SECOND TERM
BUSINESS MATHEMATICS**

10. Interest:

- i) Simple interest: Calculation of rate of interest, amount, period and principal.
- ii) Compound interest: Calculation of interest, amount, period and principal.
- iii) Problems on the growth and decay by using compound interest formula.
- iv) Amount at the end of the period, equated monthly installments (EMI) by reducing and flat interest system, problems.

11. Permutations and Combinations

- i) Concept of permutation and combination.
- ii) Simple practical problems on the use of the formula nP_r and nC_r (proofs of formulae and theoretical type problems are not expected.)

12. Area :

- i) Area of triangle, rectangle, square, circle, area of four walls of a room.
- ii) Simple numerical problems.

13. Matrices and Determinants :

- i) Meaning of determinant, evaluation of second and third order determinants. Properties of determinants (without proof). Cramer's rule.

- ii) Meaning of matrix, equality of two matrices, addition, subtraction and multiplication of two matrices. (Simple numerical problems on addition, subtraction and multiplication are expected).

Inverse of a non-singular square matrix by adjoint method.

BUSINESS STATISTICS

14. Measures of Dispersion :

- i) Meaning, absolute and relative measures of dispersion. Range, Semi-interquartile range, mean deviation from mean and median, variance, standard deviation, Variance for combined groups (only two groups are expected) coefficient of variation.
- ii) Calculation for raw data, ungrouped and grouped frequency distribution.

15. Correlation :

- i) Concept of correlation, positive correlation, negative Correlation, perfect correlation.
- ii) Scatter diagram.
- iii) Karl Pearson's coefficient of correlation.
- iv) Calculation of correlation, coefficient for ungrouped data.
- v) Statement of properties of correlation coefficient, simple numerical problems

16. Linear Regression :

- i) Meaning of regression.
- ii) Two regression equations.
- 111) Regression Coefficients.
- iv) Statement of properties of regression coefficients.
- v) Finding regression equations for ungrouped data and estimation of regression equations.
